CAREER OBJECTIVE

As a back-end developer, I have gained a strong foundation in programming languages such as C and Python. With a solid understanding of data structures, algorithms, and design patterns, I am equipped with the skills to create efficient and scalable software solutions.

PROJECT EXPERIENCE

- Created a CafeZone App using Android studio which has unique feature like live status of the restaurant and two waiting list system which helps both the cafe owner and the customer.
- Created a GarageWala App for the garage owner using the android studio and to store that data I have used the Firebase.
- Created a E-commerce sales dashboard using Power BI Tool which help the owner to take decision about his sales.
- Created a Blog website with admin dashboard by which admin can decide that which post should be published and which should not be published and can perform other CRUD operations using PHP, HTML, CSS and MySql.

SKILLS

- Problem solving
- Python
- C
- Android Development
- MySql
- GitHub
- JavaScript
- Html
- CSS
- Google Cloud
- Firebase
- Power BI

CERTIFICATION COURSES

- Introduction to Machine Learning,Kaggle
- Demystifying AI/ML/DL,AWS
- Android Application Development, greatlearning
- Data Structures in C, greatlearning
